## WASTE MANAGEMENT

We specialise in sharing cost effective waste solutions for industries.

**To name a few of our services:**

- ❖ Mechanical dredging and excavation for shoreline pollution protection, taking into account ecological factors within environmental legislation.
- ❖ Dredging excavation activities and operations partly underwater, in shallow seas or fresh water areas with the purpose of gathering up bottom sediments and disposing of them at a different location.
- ❖ Construction of temporary dunes to curb pollution.
- ❖ Our techniques are often used to keep waterways navigable. It is also used as a way to replenish sand on some public beaches, where too much sand has been lost because of coastal erosion and or pollution.
- ❖ Industrial vacuum cleaning wet ,dry, liquids and solids.
- ❖ High velocity water jetting machines and qualified technicians..
- ❖ Twin ultra high volume pumps for rapid dewatering of effluent from sumps, dams and spillages.
